To work for my career growth and better prospects, which contribute to the productivity and profitability of the organization.

Experience Summary:

- **2** years' experience as **RPA DEVELOPER** (UIPATH) in **FA Software service Private limited.**
- **6** *months of experience in* **production support in RPA Production**

Technical Skills:

- Robotic process automation (UiPath)
- MySQL
- java

PROJECT DETAILS:

Project 1: **FABI**

 Fly Ahead Bot Intelligence

It is an insurance-based process. here, we calculate differences in Target & Completion by Getting the input data from the data base. Filtering the input data based on Hub. Align, color and conditional formatting the input data and save it as excel file in folder. Convert the modified excel file as image and save it an image in image folder. Open What's app web URL. Send the converted images to hub wise. Once report sent Close What's App web. it works daily process from Orchestrator which can be run at a schedule time daily.

Project 2: **SHFL**

 -Our client, **Sundaram Home Finance Limited**

 . Mobile and Travel process

This project includes various teams each working on different technologies. UiPath is one of the technologies amongst them. It is a web automation Process by using UiPath. This Process involves migration process. It has many steps like, voucher creation, voucher authorization and HRMS completed

Here, we are scrapping the data from the web application and insert into the table. Then, we create the voucher for claims of employee. Then it will move to pending voucher Authorization stage. - in HRMS competed process, will compare the claim amount with voucher's amount. If amounts are same, it will move to HRMS completed stage. it works daily process from Task scheduler which can be run at a schedule time daily.

Project 3: **1by2 Café**

Scope: Generate the daily sales report and send it to user through WhatsApp.

It is a desktop application automation process. We download the report from the Application based on branch wise and calculate the percentage. Then the excel sheet converts to html Image. The reports send to user daily.

Project 4: **Tele Caller Details**

In this process, The details are fetched from two data tables. Merge the two data tables Based on Emp id then it will Writes in Excel. Reports send to client through Mail.
